## Hillary's Health Plan: Medicaid-Style Care For All Americans

Hillary Clinton's Health Care Plan, which is being developed in secret, has not yet been released. But leaks indicate it will include the following:

1. \$100 to \$150 billion in higher taxes. That's in addition to the largest tax increase in history already proposed in the phony Clinton "deficit-reduction" package.

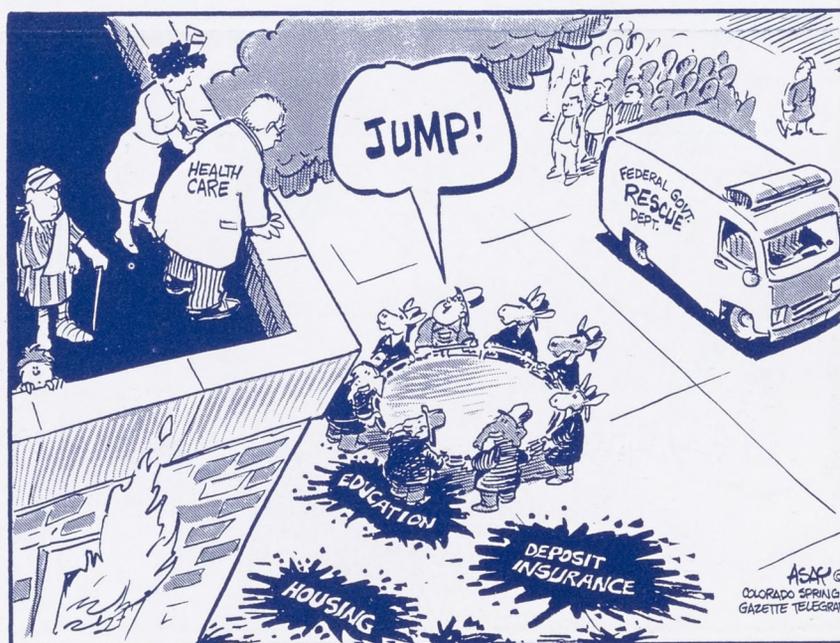

2. An unprecedented level of new federal regulation over private insurance and doctors, which will limit your right to choose your own doctor and impose price controls.

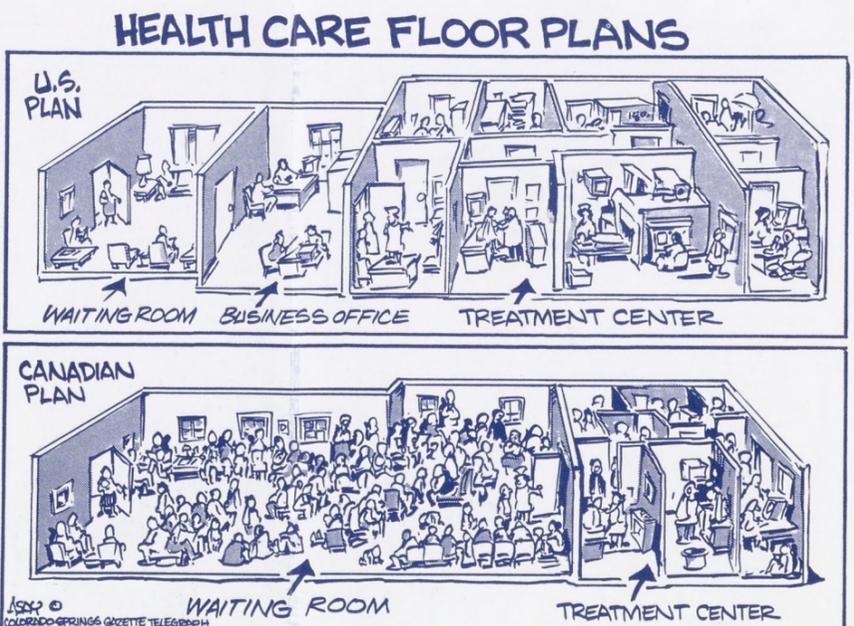

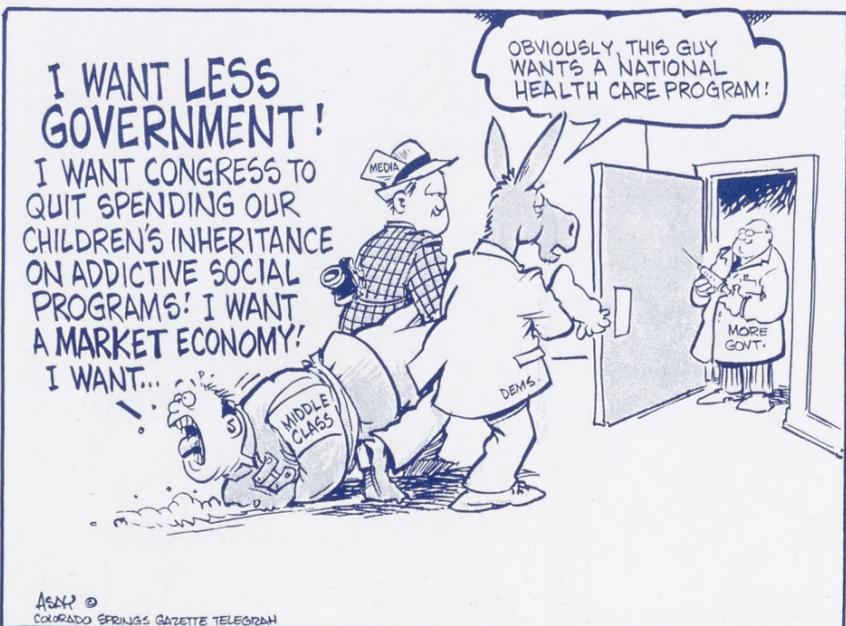

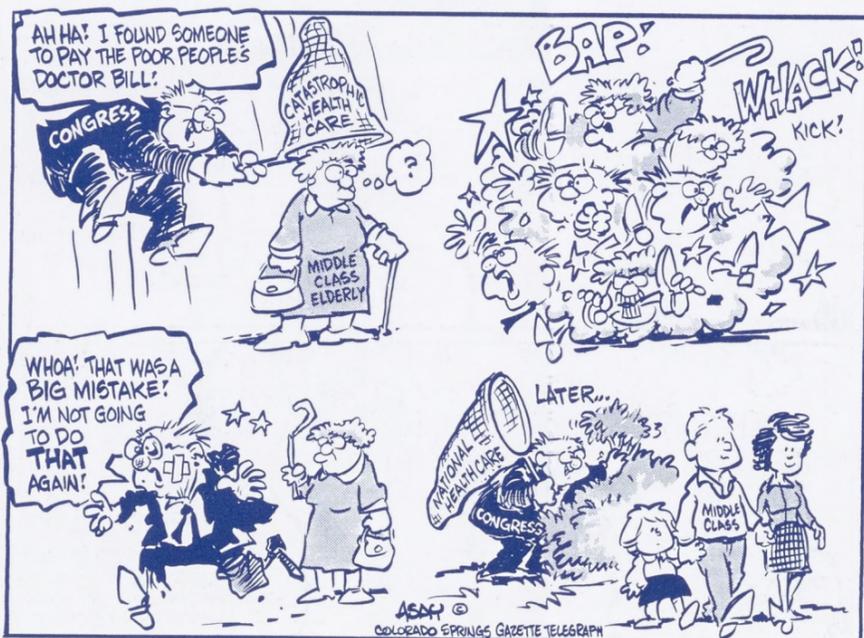

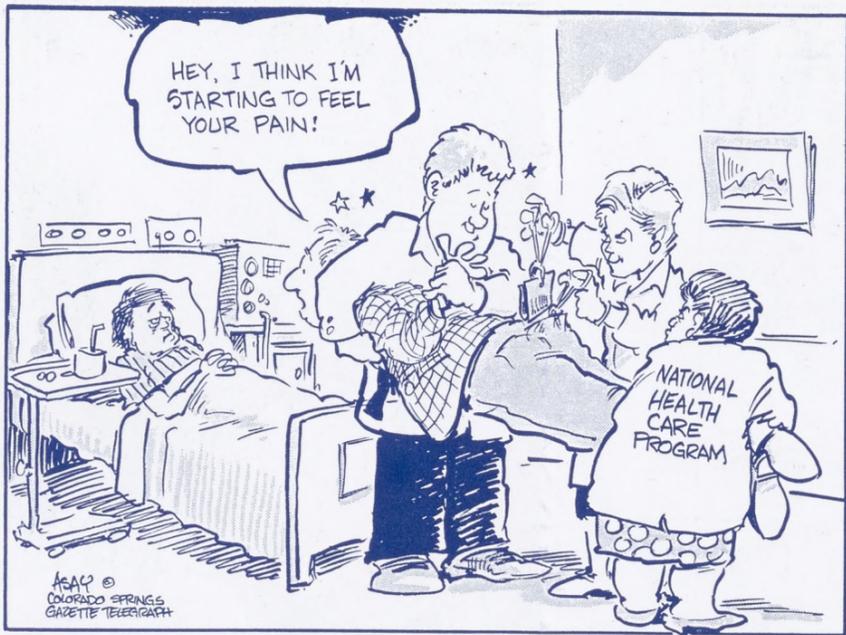

3. "Global budgets," which means giving the federal busybodies (who haven't managed anything else successfully) total control of all health care spending, public and private.

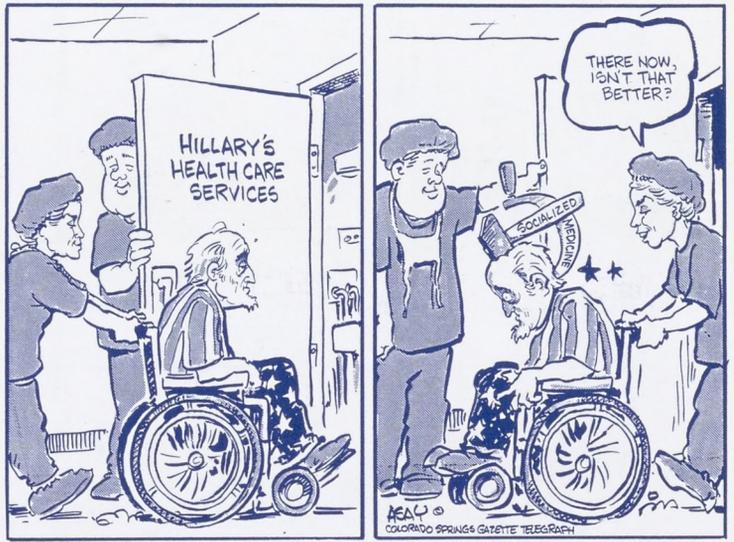

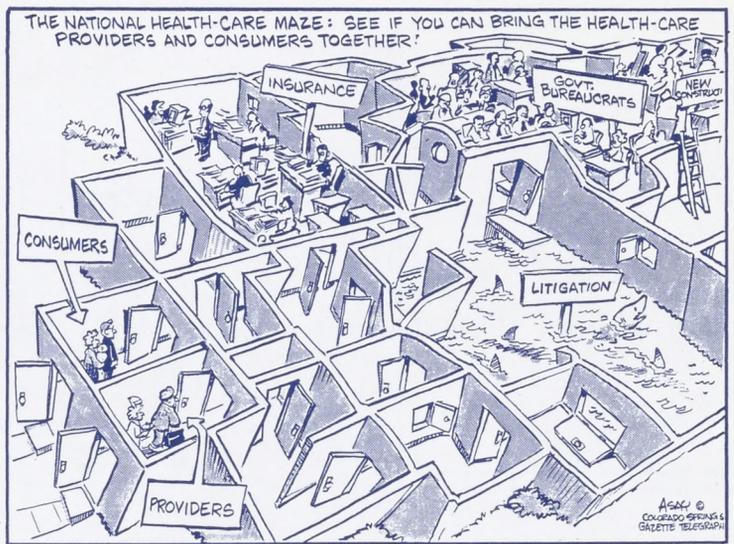

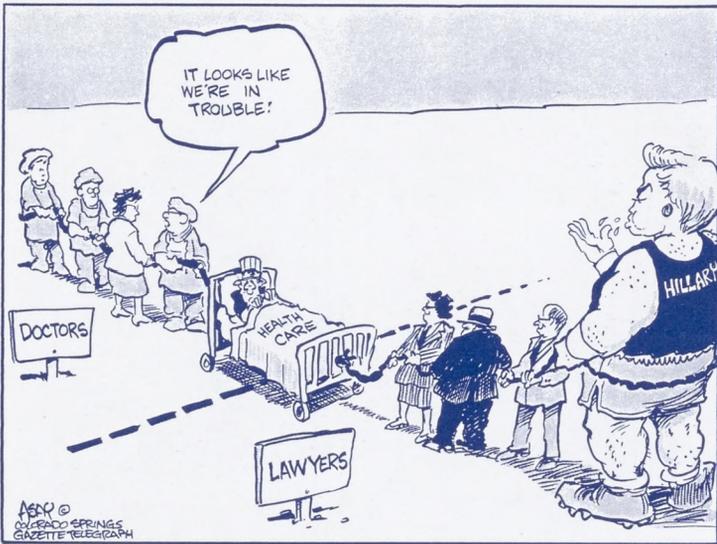

4. A "basic health benefits package," which will include making the taxpayers pay for all elective abortions (now running at a million and a half per year). The "standard" package will also promise to include such costly items as mental health care, prescription drugs, long-term care, and drug-addiction care — but the high costs of these items will inevitably mean rationing of medical care for everyone.

5. Employer mandates — forcing all employers to provide health insurance which, of course, will cause small businesses to lay off, rather than hire, employees. Still unresolved is which special interests will be allowed to opt out of the system — federal employees, who have their own special health insurance, or big businesses that are self-insured (and thus escape state-mandated benefits regulations)?

The bottom line is that, under Hillary's Health Care proposals, all Americans will be forced into a government-controlled, taxpayer-financed plan like Medicaid. That means poorer service, longer waits, tighter controls, and higher taxes.
